Riverside Surgery NHS Registration Process

We are required by the Thames Valley Primary Care Agency to ensure that patients who register with this practice are entitled to receive NHS healthcare. In order for us to check this we will require from you the information listed below. Please put a tick in the column to indicate that you have supplied this information. Your papers will be passed to our Registration Department and they will verify the details. Please ensure that you have filled in a daytime contact number in case any clarification or additional information is required.

The registration process will take approximately 5 days but failure to provide the correct information and/or incomplete forms may cause delay.

Checklist for Registration
